

PWiC - Let's TechTalk

Who we are?

Pakistani Women in Computing (PWiC) is a global community of women in technology fields and their allies hailing from Pakistan, with the aim of collaborating, growing, inspiring, celebrating, mentoring and creating opportunities for each other.

Our motive is to **learn, grow** and **connect** with the local communities and industry professionals to benefit each other by sharing knowledge and domain-specific expertise.

We are looking forward to building a strong partnership with **Otto von Guericke University Magdeburg** to sponsor this event and help us bring industry professionals here to Magdeburg who could share their experience with young professionals and graduates in attaining the right skills and exposure of Industry by organizing events.

Motivation

- To empower underrepresented groups in the tech industry.
- To bridge the gap between academia and industry.
- We need diversity in the tech industry, so as diversity in our thoughts and vision to develop communities who strive for a better future.
- To encourage young scientists about the industry needs and current developments.
- To learn and connect with professionals from the tech industry with various backgrounds.
